

OUR ENVIRONMENTAL CHARTER

Here, we care not only for our guests, but also for the environment.

We firmly believe that protecting our planet starts with simple everyday actions.

That is why we have implemented a range of initiatives throughout our establishment:

WE RAISE AWARENESS AMONG OUR TEAM AND GUESTS

- Our staff is trained in eco-friendly practices and apply them in their daily tasks.
- We encourage our guests to adopt responsible habits during their stay (recycling, choosing sustainable mobility, embracing environmentally friendly practices).

WE SAVE WATER AND ENERGY

- All taps and showers are fitted with water-saving devices.
- All lighting throughout the property uses LED technology, our common areas and corridors are equipped with motion sensors and timers. This allows us to reduce energy consumption while maintaining the same level of comfort for our guests.
- We are committed to the development of renewable energy solutions (solar panels for hot water production, heat pumps for heating).
- Guests can also participate in our sustainability efforts: bath towels and bed linen are changed upon request; and pool towels, bathrobes and flip-flops are available upon request from Reception.
- All our rooms are fitted with double glazing to help reduce energy loss.

WE REDUCE AND SORT WASTE

- A recycling station is available for our guests, each room is equipped with a waste-sorting bin, and we separate organic waste to ensure it is properly recovered and recycled.
- Single-use plastics have been eliminated in favour of biodegradable and/or reusable alternatives (refillable soap dispensers, micro-filtered water from the Brando Valley served in reusable glass bottles...).
- We reduce paper consumption by printing invoices only upon request.

WE CARE ABOUT OUR GUESTS' WELL-BEING

- Our boutique offers a selection of regional products sourced directly from local producers.
- Our restaurant and breakfast service showcase seasonal, organic and/or Fair-trade products, while giving priority to local supply chains and short distribution networks.
- All guest rooms and indoor common areas are entirely non-smoking.
- The bed linen provided in our rooms is made from 100% cotton.

AND MUCH MORE

- Our green spaces are maintained without the use of pesticides.
- We have an on-site vegetable and aromatic herb garden.
- Four electric vehicle charging stations are available free of charge for our guests.
- The cosmetics used in our Intimu© Spa are locally produced and Ecocert certified.
- Since 2023, we have operated an eco-friendly laundry facility where almost all conventional cleaning products have been eliminated thanks to our AVATAR ozonated water generator.
- Wastewater from our washing machines is filtered to capture microfibres and prevent them from reaching the oceans.

Thank you for supporting our commitment to sustainability during your stay!
